ELECTRONICS® *Original*

FUNCTION and COM
AND ALWAYS AT T

STAYING TRUE TO THE ORIGINAL

True to the Blue Streak Electronics® standard of remanufacturing, all our Body Control Modules are thoroughly and meticulously tested to meet or exceed its **original manufacturer specifications**, restoring the car to its factory new functionality.

For the optimal driver experience, we guarantee OEM specifications, the way it was originally designed - **as it was meant to be.**

Diagnosing BCM Issues

Vehicle electrical components and switch controls showing degraded responsiveness, or failing to work altogether is typically a sign of misfiring in the Body Control Module. Excessive heat, shock, movement, or mechanical wear are the leading causes of BCM failure.

That's why our testing is every bit as demanding as real world road conditions, to ensure our components are up to the task for the engine you're going to install it into.
